## FOREWORD

This is the ninth edition of our little catalog. As usual, it must find its embellishment, not in brilliant color plates or expensive typography, but in the class of offerings it sets forth. In spite of steady elimination of varieties no longer considered useful to us, ours is still one of the largest study collections of Iris on the Pacific Coast, and as the resources of three other large private collections are also available to us through arrangement with their owners, it means that in spite of our limited space we can generally meet reasonable demand and in special cases often furnish quite large quantities. We never attempt to offer at one time a full list of the 1000 or more varieties which our collection includes, so in case of specific desiderata unmentioned in this booklet special inquiry is invited.

We have somewhere seen it stated that one can feel no depression in a garden. We doubt if this be strictly true, still it is an incomplete expression of a truth. A garden, be it ever so tiny, is an epitome of life. It has, always will have, its discouragements as its joys, its obstacles as its triumphs, slimy slugs, bugs, aphids, and, most futile of all its denizens, the cutworms, which destroy in bud or seed the very tree of life which succors them; all these as well as the busy bees, the chirping tree frogs, the joyous song-sparrows, and the darting hummingbirds. Alas, we find in human life that there may be cutworms as well, but so too may there be bees and songbirds. Why is it then that in time of travail the garden means so much of cheer and is so unfailing a purveyor of peace of mind and faith and renewal of hope to those who seek its solace? Is it not because it so unfailingly rises above its own vicissitudes? No matter what befalls, ever so sad the disaster which has come to it, lo, soon the damage is ameliorated, the flowers bloom again, we find we still have much to enjoy, much to

look forward to, much to share with those less blest.

We may work in our garden, we may only loaf there, but, working or loafing, if we do it with due philosophy assuredly will we find that both we and the world are curiously the better. And it is a cumulative betterment. Of all too few human activities of the day can this properly be alleged. So we need not apologize for continuing loyalty to our gardens. They will repay in manifold.

So far as we are concerned happiness constantly fills our hearts not alone for our garden but for the many kind folk who continue to inspire us by their friendship, their counsel, or their custom, without all of which our work could not well be carried on. At this time we appreciate it more than ever before as it helps us to see through to the first fruits of the long-studied program of breeding upon which we have been engaged so many years and the real possibilities of which are only just beginning to reveal themselves. From among these our little catalog and with it your garden will henceforth be steadily richer and we hope that as more and more of the lovely blossoms unfurl to view you will realize how very much your own part has counted in it and that yours too is much of the responsibility for what has been possible.

We wish that more of you who are at a distance from us could have shared the beauty of our daffodils and irises this particular spring, even though ours be mainly an outdoor workshop and makes small pretense as a show garden. It was a queer season—all wet and cold from November to February, then a blazing dry March, and then at last our longed-for good weather the latter part of April and May. It did not suit some things, especially the early irises which were about the poorest we have ever known them, but during daffodil time we were rich in garden beauty, with several hundred varieties in flower, a good number of them, we believe, for the first time on this con-

tinent. But our greatest display was to come when, with all the shows over, the mid-season and later irises blazoned out and gave us by far the longest continued and finest showing of these, both of named varieties and of seedlings, we have ever had. It has been an established policy with us to introduce very few new irises in any one season no matter how many good ones might emerge from their spathes to tempt us. Therefore this year out of multifarious riches to choose from we have pushed aside various promising candidates and determined upon simply the four which are described on a later page—**Colonial** (named in celebration of the Washington bicentenary), **Erebus**, **Mazama**, and **Penumbra**, each of which we can recommend to you as a beautiful iris of sterling quality and not, so far as we are aware, a duplicate of anything at present in commerce.

Probably the ten finest mature clumps of tall bearded irises that we saw this year outside of seedlings not yet in commerce were: **Acropolis**, **Purissima**, **Mauna Loa**, **San Gabriel**, **W. R. Dykes**, **Osprey**, **Los Angeles**, **El Capitan**, **Sequoiah**, and **Mazama**. Of course such a list varies every season and in fact can never be twice alike, but we find it interesting to check over our old notes and see how frequently some of these names reappear. A purchaser will not go astray on any of them for a good while to come.

## SOME SPECIAL SUGGESTIONS

### BLUE-TONED IRISES

If you have learned the beauty of blue when freely used in the garden you may be glad of the ensuing list of varieties which tend more definitely than most toward that effect, as they range principally in Ridgway's beautiful columns of true violet. Of all these we think **Ariel**, **Cretan**, **Lady Charles Allom**, **Perladonna**, and **Wedgwood** particularly desirable for use in considerable quantity.

### **I. Light Tones:**

<b>Ariel (e)</b>	<b>Corrida (l)</b>
<b>Bluet (m)</b>	<b>Pacific (e)</b>
<b>Claridad (m)</b>	

### **II. Medium Tones:**

<b>Blue Bird</b>	<b>Perladonna (l)</b>
<b>Blue Lagoon</b>	<b>Realm (m)</b>
<b>California Blue (e)</b>	<b>Sensation (l)</b>
<b>Docteur Chobaut (m)</b>	<b>Wedgwood (m)</b>
<b>Lady Charles Allom (m)</b>	

### **III. Deeper Tones:**

<b>Cretan (e)</b>	<b>Joya (l)</b>
<b>Harmony (m)</b>	

## **VARIETIES WITH NOTABLY LONG BLOOMING PERIODS**

<b>Acropolis</b>	<b>Mrs. Marion Cran</b>
<b>Ballerine</b>	<b>Osprey</b>
<b>Canyon Mists</b>	<b>Perladonna</b>
<b>Crimson King</b>	<b>Purissima</b>
<b>Crucible</b>	<b>San Gabriel</b>
<b>Elaine</b>	<b>Sequoiah</b>
<b>George Yeld</b>	<b>ensata</b>
<b>Jacinto</b>	<b>unguicularis and vars.</b>
<b>Mauna Loa</b>	<b>japonica</b>
<b>Mildred Presby</b>	<b>wattii</b>
<b>Mrs. Hetty Matson</b>	

## **FOR PROLONGING SIMILAR COLOR EFFECTS**

**Try:**

**Cretan and Moa.**  
**San Gabriel and Avalon.**  
**Mrs. Marion Cran and Thais.**  
**Wedgwood, Lady Charles Allom, and Perla-**  
**donna.**  
**Mystic and Dione.**  
**Ariel and Lady Charles Allom.**  
**Mauna Loa and Morning Splendor.**  
**Citronella or Argynnis and Solana.**

## For Immediate Garden Effect

We strongly recommend planting in groups of 3 or 5 rhizomes of a kind. Such a number may often be supplied at an appreciable reduction from the regular per unit price.

## CULTURAL NOTE

The culture of Irises depends mainly upon the particular group or type to which the plants belong. That of the majority of the Pogoniris or bearded group is very simple. Abstention from the use of retentive manure, a fair amount of lime in the soil, and good drainage are the principal points to attend to. The rhizome should be set in the earth at time of planting with the roots carefully spread and the soil well firmed about them, but the top of the rhizome only barely or not quite covered. They should ordinarily be watered well when first set, but more moderately thereafter. In Southern California the most successful Iris growers are those who irrigate their plantations occasionally through the summer, perhaps every few weeks like a citrus orchard, following each watering with a light cultivation.

For fertilizer we have found bone-meal, superphosphate of lime, wood ashes, and old plaster rubble all excellent.

Occasionally someone reports inability to make established plants of Irises flower. It is not always easy to assign a cause for this, but quite often too deep planting seems to be responsible, or again it may be too much shade. Sometimes just breaking up the clump and moving to a new position is sufficient to start it going in the right way.

Under our brilliant sun it is often surprising how much shade some of the varieties will stand and still yield a certain percentage of bloom, but a rather open position is generally best for the Pogonirises, as well as for the unguicularis, spuria, and ensata types.

Ridging the beds or planting on a slope is often resorted to with notable success.

Apogon Irises require somewhat more moisture and humus in the soil as a rule, and many of them dislike lime. For some groups, notably *Oncocyclus* and *Regelia*, quite special treatment is demanded—lighter soil, plenty of sunshine, extra care in drainage, abundance of lime, and **no water in summer** even if they have to be taken up and stored dry.

Most of the *Evansias* prefer considerable shade and are among the few Irises which do their best under such conditions.

For the common and disfiguring disease called leaf-spot, spray thoroughly with lime-sulphur in winter before growth is too far advanced and keep the diseased foliage well picked off and burned thereafter as it appears.

## A WORD AS TO PRICES

Accepting the current business conditions as a challenge, we are charting our course to meet them in two ways—firstly, a reduction in prices pretty much all along the line to accord with the new general level, and secondly a relentless elimination of less worth-while kinds no matter how greatly advertised. Their places are taken in the list by an exceedingly fine line of the newer things, French, English, and American. These, together with our own new introductions, bring our collection to a fresh high level of excellence and render it a treasure mine which will repay your most careful attention. Were the same principle more generally carried out in private gardens, the joy and thrill of each new year would be as great as during the preceding one, interest would never flag, and the cumulative effect upon American horticulture would be something beyond our dreams. The merely good, in gardening as in so many other pursuits, is ever the enemy of the best. And never before have so many really splendid irises been available so cheaply as this year of 1932-33.

## TERMS

Cash with order or references.

Fulfillment of all orders subject to stock on hand.

Prices are for strong, single rhizomes. The Iris borer has not yet come into our garden and every care is taken to keep stock as free as possible of rot and other troubles.

Where stock permits, twelve roots of a variety will be supplied for the price of ten, and in the case of a variety priced at \$1 per plant or less, it is our policy to supply **THREE** for the price of **TWO**.

We offer no guaranty except to do our best, but should stock sent prove untrue to name, every effort will be made to replace same satisfactorily.

Paid orders to value of \$5 or over sent carriage free to any part of U. S., but where customer includes allowance for postage with order, extra plants will be sent to cover same.

Orders for plants, when accompanied by cash, except in the case of scarce novelties or special collections, are privileged to an additional selection of plants as follows:

Orders of \$10 to \$25 entitled to 5% additional.  
Orders of \$25 to \$50 entitled to 10% additional.  
Orders of \$50 or over entitled to 15% additional.

## OUR OWN INTRODUCTIONS

**JACINTO (1924).** Of fair size and attractive symmetry; 4 ft. stem, well branched; a tall pale blend of neutral tone with a pinkish cast .....50

**CACIQUE (1925).** H. M., A. I. S. Handsome, upstanding *fulva* hybrid, in Prune-Purple and Blackish-Purple; brilliant gold arrow on falls. Likes humus in soil and responds to good treatment. Reported hardy nearly everywhere .....\$1.00

**CANYON MISTS (1926).** A very light mauve self. Has a long season and does not fade out seriously in bright sun. A delightful subject; 3 to 3½ ft. ....\$1.00

- MAUNA LOA (1926).** H. M., A. I. S. A tall, upstanding bicolor of a strong reddish cast, the rich Dahlia Purple falls giving the dominant color note. Very large flowers, beginning early and continuing over a long season. Always one of the most admired Irises in the garden .....\$2.50
- OSPREY (1927).** H. M., A. I. S. An immense spreading pale lavender flower with a touch of yellow at the throat; shape and texture unusually fine, the one fault we have noted being a slight fading of the delicate coloring under hot sun. A leading New England grower writes: "Too much cannot be said in praise of this iris." Says another: "**Osprey** was one of the loveliest irises in the garden . . . everyone had an enthusiastic word for it"; 3 to 3½ ft.....\$3.50
- \*SAGAMORE (1928).** A superb tall **fulva** hybrid on the general order of **Cacique**, but redder and with a larger and more brilliant gold signal on the falls. The effect of this Iris in sunshine is exceedingly brilliant; height 3 ft. and over. Stock still small.....\$10.00
- CRUCIBLE (1929).** Grayish lavender with conspicuous golden throat which lends it noteworthy garden value. Large, floriferous, and distinct. An interesting parent in breeding; 3½ ft.....\$1.50
- ACROPOLIS (1929).** H. M., A. I. S. A seedling of **Conquistador** by **Moa**, combining the richness of color of the pollen parent and the antecedent **Dominion** with the size and rampancy of the seed parent. A magnificent deep violet bicolor of extraordinary carrying quality, it is one of the four or five most beautiful bearded Irises in our entire garden. No fine collection is complete without it; 4 to 5 ft. Strong rhizomes.....\$15.00
- TAFFY (1930).** A jaunty little Iris done in tones of Reed Yellow, Sulphine Yellow, Pearl and Old Gold, the general effect a taffy-yellow self; beard orange; late flowering and delightful; 18-24 in.....\$3.50

- \***WHITEHILL (1931).** A tall and shapely white Siberian with a pleasing yellow signal patch. It is an Emperor derivative. Over-sold and little stock available.....\$5.00
- \***BERNARDINO (1931).** H. M., A. I. S. This is an enormous tall lavender and rosy purple bicolor of beautiful symmetry and carrying effect in the garden. Of **Dominion** parentage, it has been outstanding even among its relatives. This grand plant is in a class with **Mauna Loa** and **Acropolis** for magnificence. Early; 4 ft. or over.....\$20.00
- \***PALOMAR (1931).** H. M., A. I. S. A large-flowered clear deep violet self, remarkable for brilliancy of color, smooth finish, and trim form, almost as though "tailored"; 3 ft. ....\$5.00
- FLUSH OF DAWN (1931).** A very floriferous soft blend in tones of Light Lobelia Violet, Light Brownish Vinaceous, and Olive Buff, all tints of the early morning sky. This is wholly charming as the light filters through the petals, and is especially beautiful for use under artificial illumination, other flowers in tones of clear blue or deep buff combining with it particularly well. An interesting parent in breeding.....\$5.00
- \***COLONIAL (1932).** A soft bicolor in tan and rose, warming in the heart to Deep Colonial Buff, and the F. with a bloom like the cheek of a peach (Dahlia Carmine of Ridgway). It is in the same color group as **Cameliard**. You will want this the moment you see it. Early; 2-2½ ft.....\$10.00
- \***PENUMBRA (1932).** A deep bicolor of striking contrast between the glowing yellow of the throat and the Vinaceous Drab S. on the one hand and deep Violet Carmine F. on the other, the sudden changes in the flower from light to shadow thus suggesting the name. The Pyrite Yellow haft is heavily veined Mars Brown, the beard solid Cadmium Yellow. It is a pity that the singularly apt name

- Paisley proved unavailable for this distinctive iris; 3-3½ ft.....\$10.00
- \***EREBUS (1932).** A very tall rich blackish purple bicolor with deep brown shading in the throat, of royal garden effect and striking exhibition quality; 4-5 ft.....\$20.00
- \***MAZAMA (1932).** This strong-growing rose-toned bicolor has been one of our most admired irises this season. The Pansy Purple falls show from afar. It is a somewhat complex derivative from **Mauna Loa** with just a touch of **Dominion** added. Though so large it has only ⅛ mesopotamica and its other ancestors are all hardy ones; 4-4½ ft.....\$25.00

### SPECIAL COLLECTION OFFER

One each of our entire series of introductions, old and new, at present prices would come to \$138.50. However, if ordered together, we can make a net cash price of \$100 for the set. The four for 1932, totaling \$65 in value, will be supplied for \$50 net.

### WILD TYPES OF POGONIRIS

We are especially interested in the wild forms of Iris and have a considerable collection of which the following of the bearded Irises are now available in more or less surplus. They are particularly interesting to those concerned in breeding work or botanically inclined, but most are likewise fine garden plants.

- Albicans.** Indispensable early white.....25
- Amas.** Asia Minor form of germanica.....25
- Baveilles.** A germanica from the south of France .....\$1.00
- Biliotti.** Low growing deep violet iris from Asia Minor .....\$1.00
- Cengialtii.** Small floriferous lavender from Italy .....35
- Como.** A pallida collected in Italy by Farrer..\$1
- Cretan.** Early rich deep violet germanica, especially brilliant when first opening.....50
- Florentina.** Early mid-season white.....25

<b>Istria.</b> Cool white with hint of green, from near Fiume .....	\$1.00
<b>Kerman.</b> Large Persian <i>germanica</i> .....	\$1.00
<b>Kochii.</b> Dark violet; early.....	50
<b>Madonna.</b> Alleged blue form of <i>albicans</i> ....	\$1.00
<b>Mesopotamica.</b> Enormous Asiatic ancestor of many of our finest hybrids.....	75
<b>Nepalensis.</b> Black-violet form of <i>kochii</i> .....	50
<b>Pallida.</b> Lovely tall lavender.....	25
<b>Pallida Dalmatica.</b> A larger and darker form ..	35
<b>Reichenbachii.</b> Dwarf yellow Balkan type.....	50
<b>Rocamadour.</b> Attractive early <i>germanica</i> from France .....	\$2.50
<b>Syracuse.</b> Fine Sicilian form of <i>albicans</i> ....	\$2.00
<b>Trojana.</b> Well-branched violet bicolor.....	75
<b>Tromagnifica.</b> Tall variant form.....	50
<b>Trosuperba.</b> Tall variant of <i>trojana</i> .....	75
<b>Variegata.</b> Wild form of true species originally from Sir Michael Foster's garden.....	\$1.50

## POGONIRIS—GARDEN VARIETIES

Duly allowing for personal preferences and special conditions, we have found all the varieties offered in the present list which we have had long enough for fair testing to be worth growing.

Varieties having the names printed in capitals are in a way specialties of ours, and of these we have developed a particularly fine stock. These are all highly recommended.

Varieties marked with an asterisk are mostly quite new sorts of which we have only very limited stocks as yet.

We are shortening the description of many of the older varieties in order to make room for the more lengthy notices required of the newer ones. More detailed descriptions can be found in the publications of the A. I. S., as well as in our older catalogues, some of which are still available for those who care to send postage for the mailing.

<b>Abenda (Perry).</b> Tall reddish blend.....	\$ .50
<b>Acheron (Sturtevant).</b> Rich dark purple; 3 feet .....	50
<b>Afterglow (Sturt.).</b> Yellow-lavender blend.....	25
<b>Airy Dream (Sturt.).</b> Tall ruffled orchid; late	\$6
<b>Alameda* (Mohr-Mitchell).</b> Large fragrant plicata .....	50
<b>Albert Victor (Barr).</b> Deep lavender pallida...	25
<b>Alcazar (Vilmorin).</b> Large bronze-purple.....	25
<b>Aliquippa (Hall).</b> Lovely soft yellow.....	\$1.00
<b>Allure (Murrell).</b> Enchanting pale orchid-flushed yellow blend; late and the better for some shade .....	\$1.50
<b>*Alta California (M.-M.).</b> Huge new 4 ft. yellow .....	\$25.00
<b>Ambassadeur (Vil.).</b> Violet and blackish maroon; late .....	35
<b>*Ambrosia (Sturt.).</b> Dainty pink-toned white...	\$5
<b>Amerind (Andrews).</b> 3½ ft., tawny brown.....	75
<b>*Andrew Jackson (Kirkland).</b> Deep red-violet; 40 in. ....	\$2.00
<b>Anna Farr (Farr).</b> Refined plicata.....	50
<b>*Anndelia (Sturt.).</b> Dainty new rose-stippled plicata .....	\$5.00
<b>*Anne-Marie Cayeux (Cayeux).</b> Handsome, tall smooth lilac blend; very distinctive.....	\$12.00
<b>Ann Page (Hort).</b> Large 3 ft., blue-lavender...	25
<b>Anosia (Williamson).</b> Bronzy gold and maroon; late .....	25
<b>Antonio (Hort).</b> Immense violet bicolor.....	50
<b>APHRODITE (Dykes).</b> Orchid-toned; smoothly finished .....	50
<b>*Apollo (Wallace).</b> Large blue-violet; 3½ ft.; new .....	\$1.00
<b>Archeveque (Vil.).</b> Rich velvety purple; low...	25
<b>Argentina (Mohr).</b> Early white; valuable parent .....	35
<b>Argonaut (Bliss).</b> Airy lavender pallida.....	35

<b>Argynnis (Wmsn.).</b> 3 ft. maroon and gold bicolor; late .....	25
<b>ARIEL (Mur.).</b> Ethereal harebell-blue English variety of charming garden effect.....	75
<b>Arnols (Barr).</b> Late dark bronze.....	25
<b>Arsace (Millet).</b> Tall grayish lilac.....	35
<b>*Arzani (Sturt.).</b> Tall reddish purple.....	\$2.00
<b>Asia (Yeld).</b> Beautiful late light lavender bicolor; often requires staking.....	35
<b>ASPHODEL (Morrison).</b> Exquisite tall, clear-toned lavender .....	\$1.00
<b>Athanael (Mil.).</b> Huge red-toned; striking effect .....	\$2.00
<b>Athene (Sturt.).</b> Lovely white with contrasting venation in throat.....	25
<b>AURELLE (Denis).</b> Rich crimson purple....	75
<b>AURIFERO (M.-M.).</b> Lovely pearly lavender with yellow throat.....	50
<b>Aurora (Foster).</b> Dainty pinkish lilac.....	50
<b>Autocrat (Cleveland).</b> Veined violet bicolor...	25

<b>Ibpall (Foster).</b> Purple-veined .....	\$1.00
<b>Ismali (Foster).</b> .....	\$1.00
<b>Korolcyp.</b> A pigmy French importation which looks like a small purple pumila but is claimed to have korolkowi blood.....	\$1.00
<b>Lady Lilford (Foster).</b> Handsome purple..	\$1.00
<b>Morera (M.-M.).</b> Mulberry purple korolkowi hybrid .....	50
<b>Nazarin (Foster).</b> Another of the interesting purple-veined forms .....	50
<b>Nefert (Foster).</b> Soft blue without markings except the darker signal; quite handsome and different from others of the type.....	\$1.00
<b>Pandora (Foster).</b> .....	\$2.00
<b>Semele (Foster).</b> .....	\$2.00
<b>Shiraz (Foster).</b> .....	\$1.50
<b>WILLIAM MOHR (Mohr).</b> The result of a parisiana-Gatesii cross and one of the most extraordinary hybrid Irises ever raised. A magnificent Iris for exhibition; demands perfect drainage. We hold a fine stock.....	\$1.25 (3 for \$3.00).
<b>Zwanenburg (Denis).</b> An odd brownish flower with purple splashes.....	35c, 4 for \$1.00

## ONCOCYCLUS

Early summer or fall delivery only)

**\*Susiana.** Grayish white veined black-maroon;

the somber but beautiful "Mourning Iris." We are not sure that our small present surplus will care for more than the current advance orders. If available, each.....\$1.50

## REGELIA

(Early summer or fall delivery only)

\***Hoogiana.** Clear satiny lavender blue. Working up a stock acclimated to our heavy soil has proven quite difficult and at present only a few surplus roots are available.....\$2.00

**Korola (Dykes).** A quaintly colored and interesting hybrid between korolkowi and stolonifera. We have not found it at all difficult to grow .....\$5.00

\***Leichtlinii.** A variant form of stolonifera..\$3.50

\***Orestes (Van Tub.).** Beautiful ruddy brown \$2

**STOLONIFERA.** A lovely bronze and blue wild species from Turkestan; acclimated stock of a particularly fine blue-bearded form and one of the choicest things in this catalog. An ideal rock garden subject, this and not the true korolkowi is what Reginald Farrer must have meant when he wrote of a certain Iris that it "is a slender grower, rising to a couple of feet at the most, and bearing one or two elongated gracious flowers, whose color is an indescribable mixture of fawn and brown, with the clearest, gentlest, electric blue. I would go any lengths to grow this, but I never have" .....\$1.50

**Turkoman (Dykes).** Another korolkowi-stolonifera hybrid which to our notion is one of the loveliest hybrid Irises ever raised. Only a few for sale.....\$2.00

\***Vaga.** Another interesting variant of the stolonifera group .....\$3.50

## REGELIO-CYCLUS

(Early summer or fall delivery only)

The following are beautiful but not, we think, altogether easy to handle. They should be treated the same as the Oncocycli. We have

been a long time trying to work up a small California-grown stock.

- Charon (Van Tub.).** Golden brown; one of the most beautiful of this group .....\$1.50
- \***Flora (Van Tub.).** Wine and brown; heavily veined .....\$2.50
- \***Hebe (Van Tub.).** Violet venation on pearly ground .....\$1.00
- \***Hera (Van Tub.).** Violet-purple with ruby and bronze suffusion .....\$1.50
- \***Hesperia (Van Tub.).** Lilac with brownish veins .....\$2.50

### EVANSIA

- Cristata.** A tiny wild species from North Carolina; likes partial shade .....35
- Gracilipes.** This woodland elf is practicable in southern California gardens only under special conditions; shade and loose woodsy earth which is not allowed to bake out. Offered subject to condition of stock.....\$1.50
- JAPONICA a.** Fleeting light blue flowers with delicate mottling; the spikes keep flowering over a long season; likes partial shade....\$1.00
- JAPONICA b.** Paler blue than preceding.....35
- \***Milesii.** A rare form from the Himalayas..\$3.00
- \***Paltec (Den.).** Interesting pallida-tectorum hybrid .....\$5.00
- Tectorum.** The well known Roof Iris; flat blue-purple flowers with a conspicuously fringed white crest .....50
- Tectorum Alba.** The exquisite white form of the preceding .....\$2.50
- WATTII.** An amazing Iris from the southeastern slopes of the Himalayas with a habit somewhat recalling a dwarf bamboo; flowers white or slightly tinted, borne in airy panicles over a long season; scarcely known to American horticulture as yet and therefore of untested hardiness in most parts of the country, but in Southern California at least in no respect a difficult subject.....\$1.00

## APOGON

### American Species

**CACIQUE.** (See introductions).

\***Chrysopenicia.** Tall reddish purple from Louisiana .....\$2.50

**Foliosa b.** A particularly lovely collected form from Mississippi .....50

**Fulva.** Interesting bronze-red form from the south .....\$1.00

**Dorothea K. Williamson (Williamson).** The most brilliantly colored Iris in this group, saving Sagamore .....75

**SAGAMORE.** (See introductions).

**SAVANNARUM.** Handsome, tall blue Apogon from the Florida swamps, which has proven very amenable to California cultivation....\$1.00

**Shrevei.** A beautiful wild lavender Iris from Arkansas .....50

**Shrevei b.** White, bordered pale lavender; exceptionally fine foliage; a delightful and interesting subject, especially adapted to a rather moist position .....\$1.00

\***Vinicolor.** Tall wine-colored Iris from Louisiana .....\$2.50

### Mediterranean Group

#### (Winter flowering)

**Unguicularis.** Light violet.....50

\***Unguicularis Lilacina.** An imported form highly thought of in England .....50

**UNGUICULARIS VIOLACEA.** The most luxuriant grower among the exquisite winter-flowering Mediterranean Irises. This is what we formerly listed as **Marginata**, but as there is a form going under this name which is much more conspicuously margined as well as less rampant, it seems best to use some other appellation for the present form. Lovely for long borders; September to April.....25  
(Per 100, \$20.00; good clumps, 50c each).

**UNGUICULARIS ALBA.** White and gold; slightly shorter blooming season than preceding. Says the inimitable Farrer, "It is a flower straight from heaven—a transcended snowy Crocus or Zephyranthes." Same price.

\***Queen Elizabeth.** Small blue-lavender with white venation .....\$1.00

### Spuria Group

(Fall and winter delivery only)

**A. J. Balfour.** Fine, tall, blue.....\$1.00

\***ALICE EASTWOOD (Branin).** A magnificent ochroleuca hybrid. One of the handsomest Irises in this group.....\$5.00

**Aurea.** Tall, deep yellow.....75

**SPURIA HYBRIDS.** We believe this charming strain of seedlings to be better referred to spuria than to halophila as heretofore; varying from cream into different tints of lavender, they are lovely for the house; 4 ft. ....75c, 6 assorted for \$3.50

\***GOLDEN STATE (Branin).** Big tall, deep yellow, of splendid form and style; absolutely outstanding in every way; true stock, very scarce .....\$12.00

**Graminea.** Dwarf purple grassy-leaved species suitable for rock garden or low border; fragrance of ripe plums .....\$1.50

\***Halophila lutea.** Small, creamy; 2 ft.....\$1.00

**Juno.** An interesting blue-purple of the Monspur type .....\$1.00

**Lord Wolseley.** Handsome blue-purple hybrid; tall .....75

**Monaurea.** Tall, medium-toned yellow.....\$1.50

**Monnieri.** Moderately tall, soft yellow.....75

**Monspur.** Tall, blue-purple .....75

**Notha.** Beautiful pale lavender spuria.....50

\***Ochraurea.** A fine tall hybrid in two shades of yellow .....\$1.50

**Ochroleuca.** Tall, white and yellow.....25

<b>Ochroleuca Snowflake.</b> A beautiful variant form; tall .....	50
<b>Ochroleuca Warei.</b> A very handsome variant of ochroleuca .....	75
<b>*Queen Victoria.</b> A splendid tall cream and gold Iris .....	\$2.50
<b>SHELFORD GIANT.</b> One of the grandest plants in the group .....	\$2.50
<b>Spuria.</b> Lavender-blue .....	50

### Siberian Group

(Fall and winter delivery only)

<b>*CAEZAR (Morgan).</b> We are very fortunate in being able to offer a few plants of this superb new deep violet Siberian.....	\$3.50
<b>*Delavayi.</b> Interesting tall blue species from Western China. We have a very few acclimated plants .....	\$1.00
<b>Emperor.</b> Magnificent dark blue collected form; easy .....	50
<b>Florrie Ridler (Perry).</b> Deep blue.....	75
<b>Lady Northcliffe (Perry).</b> Deep violet with white throat .....	75
<b>Perry's Blue.</b> Fine light blue .....	50
<b>Perry's Pigmy.</b> Dwarf blue.....	50
<b>Snow Queen.</b> Snowy white, yellow throat.....	50
<b>*Whitehill.</b> (See introductions).	

### Miscellaneous

<b>ENSATA.</b> Asiatic species; small fleeting lavender flowers over a long period.....	\$1.00
<b>Foetidissima.</b> The Gladwyn Iris; an exceptionally fine strain with handsome deep green leaves, and flowers varying from greenish and light yellow tones to bright red-purple; ornamental pods of bright scarlet seeds in fall .....	\$1.00
<b>Japanese Iris, Alice Kiernan.</b> The loveliest of this type we have grown; crepy white with a blue misting on the fall; fall and winter delivery only .....	\$1.50

- \***Japanese Iris, Violet Beauty.** Deep velvety violet self .....\$1.00
- Pseudacorus Gigantea.** A giant yellow marsh flag; very fine for a moist place.....50

## JUNO

(Early summer or fall delivery)

- \***Bucharica.** A very few acclimated bulbs to offer of this quaint little cream and gold Iris from Bokhara .....\$2.50
- \***Persica.** A ravishing combination of grayish lilac, sea green, and brown; an easy Iris to manage in some soils, in others almost impossible. Offered subject to stock.....\$1.50

## OTHER BULBOUS TYPES

(Early summer or fall delivery)

Our little stock of these never lasts long and orders should get in early.

- \***Histrio.** Quaintly marked small lavender species from Galilee .....\$1.50
- \***Reticulata.** A very few bulbs to offer of this small brilliantly colored species.....75
- \***Vartani alba.** The jewel-like white form of this exquisitely fragrant wee species from the Holy Land, excessively rare in occidental cultivation .....\$2.50

## SPECIAL COLLECTIONS

Some suggestions for those uncertain how to choose, or who wish a pleasing gift for a gardening friend. All collections are carefully labeled.

### “Iris Calendar” Collection

#### For All-Year Bloom

36 plants, including at least 12 distinct varieties selected to cover as nearly as possible the entire year by their blooming period. This is a particularly useful collection for a Southern California garden .....\$10.00 net

#### For Early Bloom

**Collection 1.**—3 Mauna Loa, 3 San Gabriel, 3 Albicans, 3 Soledad.....\$10 00

**Collection 2**—5 Zwanenburg, 5 Soledad, 3 dark purple dwarf; a very pretty grouping can be made with these .....\$2.50

### **“California” Collection**

For those who wish to try a series of the superb new Californian productions in Irisdom we offer (1) a beginning collection of 12 distinct varieties, our selection, for \$10.00, and (2) a still finer collection comprising the same number of varieties for .....\$25.00

### **“Sunshine” Collection**

For those who like yellow we offer (1) a set of 10 different yellows and yellow bicolors for \$5.00; also (2) a finer selection to the same number of plants for.....\$10.00

### **“Orchid” Collection**

For those who find themselves captivated (as who is not?), by the charming orchid-like hues being developed in the modern iris, the colors commonly advertised as pink, we can similarly offer (1) a set of 10 different, but all in these tones, for \$3.50, and (2) a finer selection to the same number of plants for.....\$5.00

### **“Select” Collection**

Finally, for those who desire a bargain, yet covet the joy of picking for themselves, we can send any 10 of the following varieties for \$2.50 postpaid, or any 25 for \$5.00: Alameda, Ambassadeur, Ann Page, Asia, Avalon, Belisaire, Cameo, Chasseur, Citronella, Colias, Conquistador, Cygnet, Damozel, Delicatissima, Don Quixote, Dream, Edouard Michel, Empress of India, Gen. Gallieni, Geo. Yeld, Harmony, Homer C., Hyperion, Isoline, Jacinto, Mme. Cheri, Marjorie Tinley, Mary Williamson, Mopsa, Morning Splendor, Mother of Pearl, Muzeris, Nancy Orne, Old Ivory, Prince Charming, Soledad, Steepway, Susan Bliss, Tenebrae, Theseus, Wild Rose.

If a better lot is desired, we can send any 10 of the following for \$5.00 postpaid: Aphrodite,

Aurette, Aurifero, Belisaire, Bertrand, Bonita, Candlelight, Canyon Mists, Cretan, Elaine, Germaine Perthuis, Glorise, Gold Imperial, Lady Sackville, Lona, Mme. Cecile Bouscant, Mildred Presby, Moonlight, Mrs. Marion Cran, Pioneer, Proteus, Reverie, Romola, San Gabriel, Vesper Gold, Wedgwood, Zulu.

If a yet finer lot be desired, we can send any 10 of the following for \$10.00 postpaid: Asphodel, Athanael, Crucible, Dolly Madison, El Capitan, Flambeau, Jane Williamson, Labor, Peerless, Seafoam, Sequoiah, Shasta, Snow White.

Or any ten of the following for \$25.00 postpaid: Anndelia, Cavalcade, Druid, Flush of Dawn, Hoarfrost, Los Angeles, Melchior, Osprey, Purissima, San Francisco, Sir Michael, Taffy.

### **IRIS COLLECTION FOR BEGINNERS**

Ten varieties, named, for \$2.50, postpaid; very good value selected. Twenty varieties, \$5.00. Fifty varieties (a fine lot, including many uncommon things), \$25.00. Same collections in triplicate at double the price.

Cheap named varieties for mass plantings, \$15.00 to \$25.00 per 100; carriage extra.

## 1932 DISCARD LIST

The following irises have been eliminated from our garden the past season for an assortment of reasons and we anticipate relisting none of them:

A. E. Kunderd	Lysander
Alvarado	Mme. Blanche Pion
Amber	Mme. Boulet
Ann Bullen	Mme. Chobaut
Azulado	Mme. de Sevigne
Balboa	Mme. Henri Cayeux
Barrelane	Magnificent
Beau Ideal	Mariposa
Bolingbroke	Melody
Candelabre	Mesella
Canopus	Micheline Charraire
Captain Coffin	Minos
Carmelo	M. Trinidad
Claudio	Nirvana
Daniel Lesueur	Nothung
Deucalion	Oread
Dido	Perry's Favorite
Ember	Powhatan
Flavescens alba	Prinz. Viktoria Luise
Gladys Roberts	Pvt. W.A.Logan, M.M.
Glow	Rosado
Gray Morn	Rose Salterne
Grevin	Safrano
Gypsy Queen	Shallow
Hakador	Sophronia
Harriet Presby	Sulphurea (spuria)
Helena	Taffeta
Hermione	Tertio (spuria)
Horizon	Toreador
Imperator	Victorine
Janthea	Warrior
Kestrel	White Queen
Le Grand Ferre	Yeoman

## OTHER BULBS

(For Summer or Early Fall Delivery)

\***Freesia Apotheose.** Grand large-flowered pink variety from Holland. Very few bulbs to offer; each .....50

- Freesia Buttercup.** A *Freesia* of Dutch origin which is close to being the finest yellow variety in commerce; wonderful for California; strong home-grown corms.....per doz. \$1.00
- \***Freesia Contrast.** Creamy white with strongly contrasting yellow blotch.....per doz \$1.00
- \***Freesia Yellow Queen.** Clear light yellow....50
- Gladiolus tristis.** Charming slender African species; early and deliciously fragrant at night .....6 for \$1.00
- Muscari armeniacum.** ....per doz. \$1.00
- Muscari Heavenly Blue.** .....per doz. .75
- Narcissus biflorus.** Interesting collected form; late .....10 for \$2.00
- Narcissus canaliculatus.** Quaint pygmy tazetta from the Riviera. Reported shy of bloom in some gardens, but a delightful subject where suited .....10 for \$2.50
- Narcissus bulbocodium.** The quaint "hoop-petticoat daffodil" .....10 for \$2.50
- \***Sparaxis.** Red, with black, white, and yellow markings; exceedingly vivid and gay; doz. \$1
- Scilla Campanulata Excelsior.** Glorious tall blue; acclimated bulbs .....per doz. \$1.50
- \***Bletilla hyacinthina.** Beautiful Chinese terrestrial orchid of the easiest culture in Southern California; deep rosy lilac with white-pleated shirt front. Strong tubers .....\$3.00
- \***Bletilla hyacinthina alba.** The exquisite white form .....\$10.00
- Camassia Mauve Queen.** Tall pale mauve; 5 for .....\$1.50

(Available at Any Season)

- Hedychium coronarium ("Ginger Lily").** Can-na-like growth; waxy white flowers with a rich fragrance; fall blooming.....50
- \***Hedychium gardnerianum.** Taller, with deeper green foliage and yellow flowers.....\$1.00
- Hemerocallis Aureole.** Clear orange yellow...50

<b>Hemerocallis Calypso.</b> Light yellow Burbank hybrid .....	50
<b>Hemerocallis fulva.</b> The old-fashioned tawny day-lily .....	25; 5 for \$1.00
<b>Hemerocallis flava major.</b> Low light yellow...	35
<b>*Hemerocallis Golden Bell.</b> Large clear bright yellow flowers of beautiful form and delightful fragrance; an importation and one of our finest .....	\$5.00
<b>*Hemerocallis. Gold Standard.</b> Large deep yellow .....	\$2.00
<b>Hemerocallis Maggie Perry.</b> New English fulva hybrid in deep coppery orange, almost red..	\$2
<b>Hemerocallis Sovereign.</b> Deep yellow.....	50
<b>*Moraea iridioides.</b> Lovely Iris-like flowers through a good part of the year; ornamental foliage .....	50
<b>Sisyrinchium striatum.</b> An interesting "Blue-eyed Grass" from Chile, with tall racemes of creamy yellow flowers. Unusual and exceedingly effective in the landscape.....	5 for \$1.00

## IN TIME OF DEPRESSION

"We who believe that the garden affords the best possible restorative mechanism to worn humanity want that agency to have its fullest usefulness now. The garden advantages gained because there is more time for the garden are never wholly lost, and even a boom will not dissipate these advantages. So I write in the hope that others who read . . . . will open their gardens fully, will nurture them thoughtfully, and will thus give that best aid to the depression difficulty which comes from contemplation of and working with the things that God has caused to grow on and in this fair land."

J. Horace McFarland,  
In HORTICULTURE.

This is one of the few American magazines which has maintained and even elevated its standards through all these recent trying years of popular madness. If you do not know it, you should make its acquaintance. If you do not have it, you should get it,—bi-monthly, and only \$1 a year. Address HORTICULTURE, Horticultural Hall, Boston, Mass.

And then, while you are at it, join

### *The American Iris Society*

It publishes four Bulletins a year and brings to its members all the latest news about Iris. It will help you enjoy your garden more, and will prevent your making many mistakes.

Membership is \$3.00 a year. The money may be sent to us or directly to the Secretary of the Society, Mr. J. B. Wallace, Jr., 129 Church Street, New Haven, Conn.

Include these two subscriptions with your order and we will send you a dollar iris free as an extra.
